Education

Trinity College Hartford, Connecticut

BS, Computer Science & Mathematics |Cybersecurity Experiential Certificate | GPA: 3.9 Sep 2023 - May 2027

Relevant Coursework:

- **Computer Science**: Data Structures & Algorithms, Analysis of Algorithms, Computer Systems, Software Engineering, Deep Learning, *Artificial Intelligence* (in progress)
- **Security**: Computer Security, Sensitive Information in a Connected World
- **Mathematics**: Linear Algebra, Numerical Analysis, Dynamical Systems, Statistics

Experience

Bloomberg New York City, New York

Software Engineer Intern Jun 2026 - Aug 2026

- Analyzed JSONL phishing logs to identify fields needed to reconstruct user's actions after receiving a phishing email.
- Built a phishing pipeline in Python that converts raw logs into a single timeline for each affected user.
- Integrated the pipeline into the team's existing codebase, mirroring their front-end template to display its output.

Trinity College Hartford, Connecticut

Cybersecurity Intern Jan 2025 - May 2025

- Evaluated Trinity's cloud using Microsoft's Zero Trust Maturity Assessment against CISA's Identity and Device pillars.
- Co-authored a report and methodology for the CISO, to support assessment across the remaining Zero Trust pillars.
- Presented findings and recommendations to the CISO, CIO, and staff across IT, library, and research departments.

Trinity College Hartford, Connecticut

Undergraduate Research Assistant Jun 2024 - Dec 2025

- Designed and led an IRB-approved user study investigating susceptibility to homoglyph URL spoofing and DV-to-EV certificate downgrade attacks, authoring the research protocol, consent documentation, and pre/post-study surveys.
- Built the study's test environment with mock phishing and legitimate sites replicating real-world spoofing and certificate-downgrade techniques.

Projects

Multiplayer Card Game Web App Sep 2026 - Present

Personal Project

- Building a real-time multiplayer web version of Conker with a React frontend for the lobby, table, and hand, and a Python backend that manages game rooms and live turns.
- Designing a pure-Python rules engine that validates every move server-side and backing it with automated pytest tests. A computer opponent plays through the same engine.

Leadership

Ethiopian Orthodox Tewahedo Church Hamden, Connecticut

Sunday School Teacher (Ages 13-18) May 2025 - Present

- Developed and launched a community website to centralize and manage materials and communications.
- Created a weekly curriculum that simplified complex concepts into teachable lessons while supporting sustainability.

Skills & Interests

Languages: Python, SQL
Libraries & Data: Pandas, Jupyter Notebook
Development Tools: Git, React
Certs: Google Cybersecurity Professional Certificate
Interests: Sporcle, Puzzles (Logic & Jigsaw), Chess, Reading

Affiliations

- WiCyS (Member & Chapter President)
- Pi Mu Epsilon

Awards

- Phi Gamma Delta 1st Year Second Prize
- Dean's Scholar
- Faculty Honors List
